What's FESmarket?

FESmarket presents an innovative, efficient and sustainable shopping experience in supermarkets. The main product is a smart shopping cart that allows the user to scan products automatically and pay instantly. A display allows the user to find the products, the shopping cart, and supermarket offers. In addition, the user will be able to download the app to add their shopping lists, shopping history and discounts.

Sustainability

The product, which is committed to sustainability, uses recycled materials and has a renewable energy source. The shopping cart, made of recycled plastic and the structure of easily recyclable metals, allows for a second use of the product. On the other hand, solar panels are installed in the supermarkets to supply the energy needed for the trolleys. This also means that charging stations are installed to store the product after use.

(AUTOMATIC SCAN)**

Step-by-Step

5

TAKE THE BAGS AND LEAVE THE CART

6

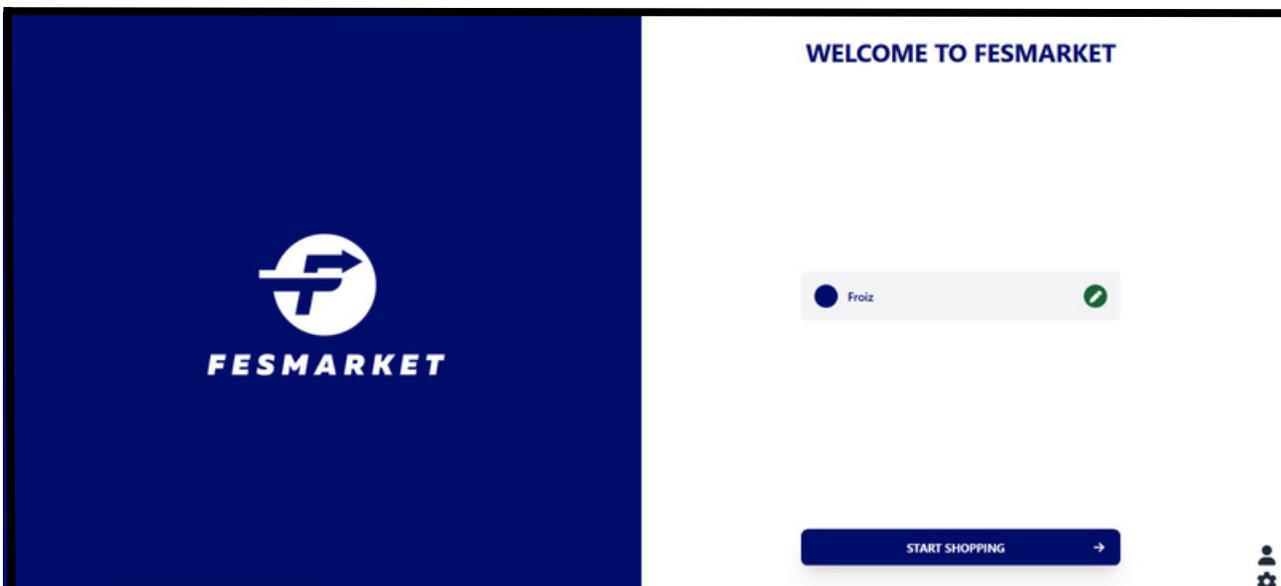

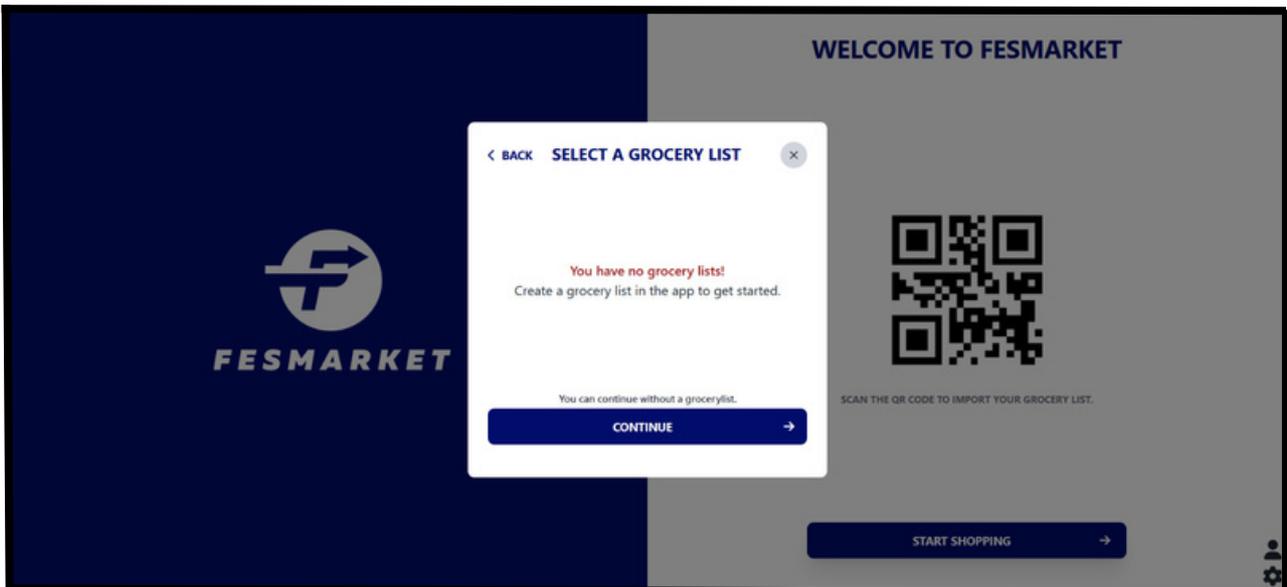

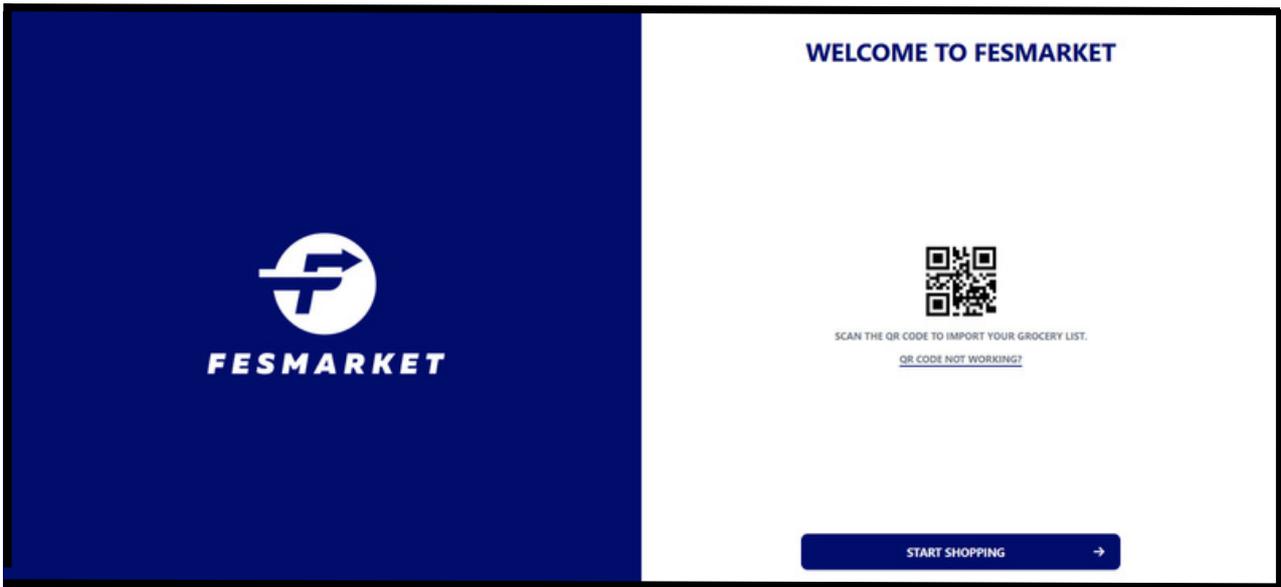

AUTOMATIC PAYMENT

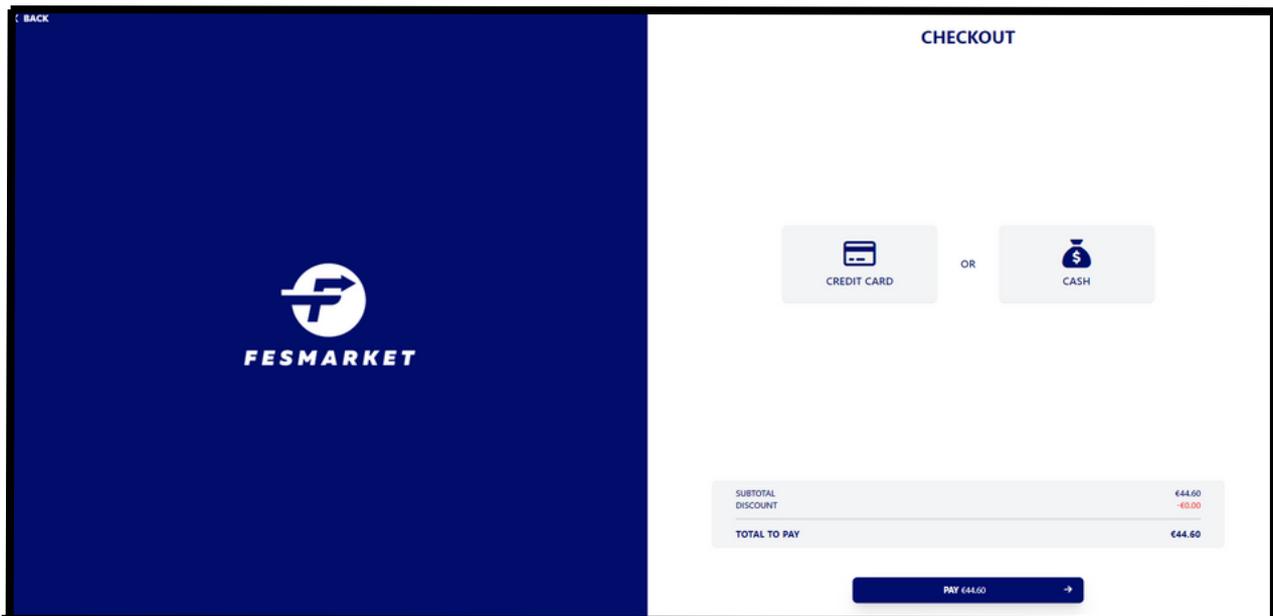

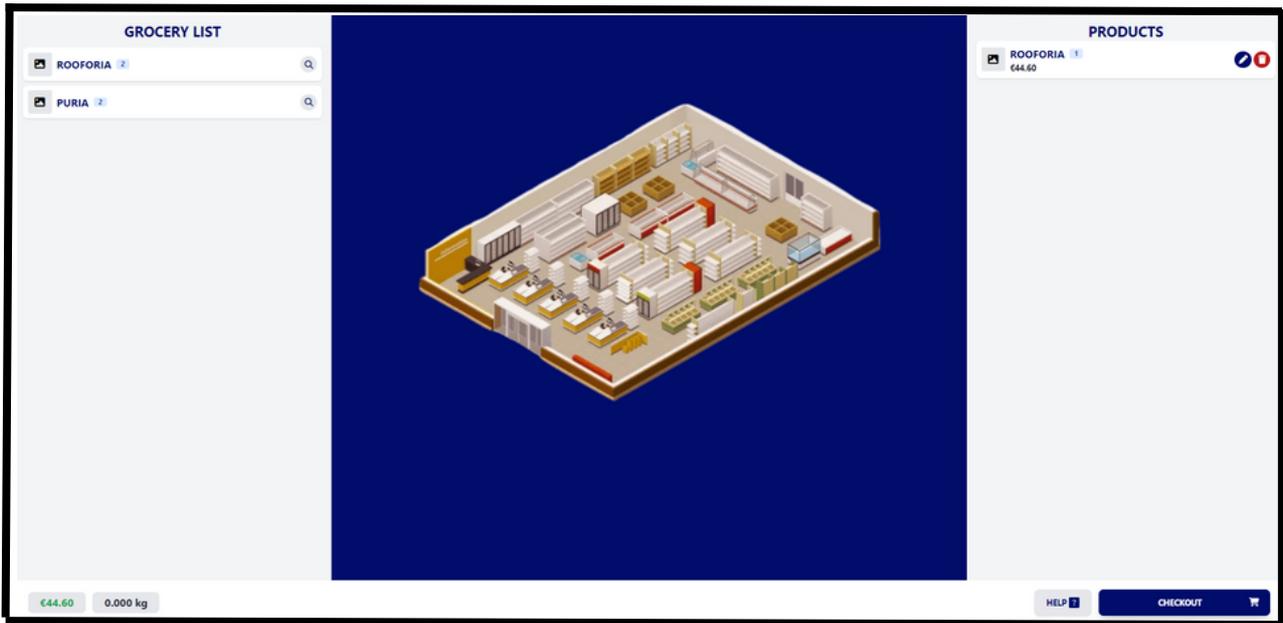

Note: The Smart Shopping Cart has sensors that prevent products from being taken out of the cart unintentionally. An alarm is triggered in case of attempted theft or unpaid products.

Important notes: Make sure the Smart Shopping Cart is sufficiently charged before use. Regularly update the app and the shopping cart firmware to benefit from the latest features and improvements.

Warranty conditions

Each smart shopping cart is checked by FESmarket company with great care before delivery and undergoes a final inspection. In the event that you have a complaint, please follow our established procedure for prompt resolution. Unless otherwise agreed in the contract, the warranty period starts from the date of delivery and ends after 24 months. The detected defects must be reported to the company FESmarket no later than 14 days from the date of their detection, using the completed return form. The warranty covers defects that are demonstrably due to material or manufacturing defects. The costs incurred by rectification of defects, as well as associated transport and assembly costs will be borne by FESmarket. Further claims are excluded. Defective parts that are replaced become the property of FESmarket. For the newly inserted parts a new 24-month warranty is granted. However, these repairs do not restart the warranty period for the entire product. Any repair or service must be carried out by the FESmarket company or by specialized companies authorized by FESmarket. In case of non-observance, the full warranty cannot be accepted. In case of non-observance of the operating instructions, unsuitable or improper use, faulty assembly (by third parties) or damage caused by an external action, there is no claim to the warranty.

Safety

FESmarket shopping carts are designed exclusively for transporting shopping goods in self-service markets. Your employees must advise and assist the end customers in handling shopping carts. To do this, you train your staff if, for example, trolley baskets are overloaded with beverage crates, customers drive on the moving walkway with trolleys that are not driven on the moving walkway, children hang on the side of the cart, trolleys are not used for their intended purpose. FESmarket shopping carts are designed for use in the indoor areas of self-service stores and the associated and the associated customer parking areas.

WARNINGS

- **Warning:** Against soiling of the basket by children or animals taken along. Consequence: Soiling and introduction of pathogens through dirt into the basket.

Into the trolley basket:

- Make sure that children or animals are not transported in the trolley basket for hygienic reasons.
- **Warning:** rolling away of the shopping cart. Consequence:
- Make sure shopping carts are always held in place while in use. Warning:
- **Warning:** against improper use of the shopping cart. Consequence: The shopping cart may tip over, damage objects or injure persons.
- Ensure that the shopping cart is only used as intended.
- Make sure that the shopping cart is not used on escalators.
- Make sure that the shopping cart is not lifted, tilted or carried.
- Make sure it is always pushed in a controlled manner and not pushed away or rolling down sloping surfaces without a guide.
- Make sure that no goods are transported in the shopping cart that are sticking out from the side.
- **Warning:** Lateral attachment to shopping carts. Consequence: overturning of shopping carts, damage to objects, risk of injury to persons, to small children and for the person hanging on to the side.

CE marking

The smart shopping cart complies with all applicable European directives and standards to ensure the safety and performance of the product. In this chapter, we will explain the CE mark and Declaration of Conformity in more detail to help you better understand how to comply with the relevant regulations.

The CE mark is a legally required mark that indicates that the smart shopping cart complies with the applicable European directives. The mark consists of the letters "CE", which are closely connected. It must be clearly visible and permanently affixed to the product.

The declaration of conformity is a document issued by the manufacturer confirming that the smart shopping cart complies with the relevant EU directives. This declaration contains information about the manufacturer, the product, the applied standards and the applicable directives.

The CE mark indicates that the smart shopping cart complies with the essential requirements for safety, health protection and environmental protection specified in the relevant European directives. It also signals that the product has been tested by a notified body to verify its conformity.

It is important to note that any changes made to the smart shopping cart may invalidate the CE mark and the declaration of conformity. If you make any changes to your product or have any doubts about its conformity, please contact the manufacturer or authorized customer service.

Make sure that the CE mark on your smart shopping cart is clearly visible and legible. Check regularly whether the label has become damaged or illegible. If this is the case, please contact the manufacturer or authorized customer service to rectify the problem.
