

**FESMARKET**

# PRODUCT PACKAGING

## PACKAGING AND TRANSPORTATION

The packaging of consists of a **sturdy box or container** that protects the product during transport and storage. Cardboard boxes with a size of **1300 x 600 x 1300 mm**.

For shipping, shopping carts are usually shipped in single units or in larger lots, depending on the needs of the seller and the buyer. Shipping can be done through courier services or transport companies, using methods such as trucks, planes or ships, depending on the distance and delivery location.

In terms of transportation, FESmarket products are transported in specialised vehicles, such as cargo trucks or vans, which can accommodate their size and weight. Trolleys can be stacked or secured in the vehicle to ensure safe delivery.

It is important to note that the specific details of packaging, shipping and transportation may vary depending on the manufacturer, seller and logistical arrangements in place.
